Valard Construction was selected by Wataynikaneyap Power to provide engineering, procurement and construction (EPC) solutions for the Wataynikaneyap Power Transmission Project in Northwestern Ontario, Canada.

The scope of work on the Project consists of EPC services for more than 1,600 kilometres of transmission and distribution infrastructure ranging in voltage from 25 kV to 230 kV and 22 substations. Valard created this newsletter to provide regular updates on construction activities for the 24 First Nation owner communities.

* Yellow outline indicates work areas.

Three-Month Lookahead - Field Activities Proposed schedule as of January 15, 2023 Period: January 1, 2023 to March 31, 2023 Note: Subject to change based on field conditions.

BOOTS ON THE GROUND—Locally hired crew members tell us what working on the Wataynikaneyap Power Transmission Project means to them!

I USE MY CAMERA TO SHARE OUR PROJECT WE WORK ON

Sage Mamakeesick, Lac Seul First Nation

Sage in front of a piece of machinery on the Wataynikaneyap Project along with two stickers he designed for the project.

My name is Sage Mamakeesick. I am from Lac Seul First Nation. I have been on the Watay project for two years now, currently on my third winter.

More recently I have been taking up photography and sharing what I see on a daily basis and sharing what others outside see within. High school exposed me to photography, videography and media. Finding ways to convey information through these methods, I use my camera to share our project we work on.

Photos are usually taken when it presents itself, a sunset, tower angles, helicopters lifting material. I rarely have to go out and get a specific photo. More recently I've started to create designs for stickers, printed and sharing them with coworkers and friends.
